

DCMC Dispensary at Ramkrishna Nagar Village

With your support and goodwill we were able to complete the construction of the outpatient village dispensary at Ramkrishna Nagar. It was attended on April 16, 2005 by two Physicians, Dr. K.K. Das and Dr. A.N. Bhattacharyya, a famous orthopedics from New Delhi. A number of patients visited the dispensary that day and consulted with the Doctors. The local youth groups from Vivekananda Vyamagar and a few families were also present at the dispensary on that day.

Two significant improvements in the Dispensary were noticed on that day. Newly installed electrical system, and a working Telephone. Thanks to Mr. Prasanta Choudhury of Karimganj for providing the complete electrical system including supplies and for complete painting of the interior and exterior of the building en-gratis as his contribution to the Dispensary. This is a sheer blessing to the villagers. When asked over phone as to what he'd like in return, he replied "just love and nothing else". Fortunately, there is plenty of that in this little village. The First Outpatient Village Dispensary built by DCMC Foundation in Ramkrishna Nagar (RK Nagar) opened its door to the Patients on September 14, 2004. Under the Supervision of Dr. K.K. Das the dispensary became fully functional now with plenty of water supply and sanitary facilities. However, there is a need for proper management of the facility. Mr. Kajal Esh Choudhury, who lives next door, is providing a great support in looking after the center.

A few pictures from the 2005 visit to the facility is provided below:
